(54) Title: SYSTEM FOR CODING A RECORDED IMAGE, AND METHOD THEREFOR

(57) Abstract: The present invention provides a method for making, viewing and/or ordering a photographic image, comprising the following steps of: - making a recorded image with a digital camera; - wirelessly sending the image, immediately after it has been made, to a processing unit for processing of the digital data from the digital camera; and - wirelessly sending a code to a printing unit during processing of the digital data, which printing unit is disposed close to or at a predetermined distance from a digital camera, wherein the person of whom an image is made receives a receipt with a code with which he/she can view and/or order the recorded image.
